Detailed information

I am looking for a job in a company with promising career opportunities. I want to be useful and work on the result.

My goal is to find a job full time. I want to work in a team and in interesting projects, gain new knowledge and develop as a quality assistant engineer.

I assembled a team that supports a transportation company in the United States. I am currently the manager on this team.

Learned to create landings using HTML, CSS and JavaScript. I can also create simple sites on WordPress and transfer them to hosting and continue to support them.

At the moment I'm learning to write simple programs in Python.

Skills

Quality Assurance

Checking the finished product for compliance. Search for bugs and defects, assessment of the correctness of the work.

Evaluation of the product for compliance with pre-agreed quality parameters. Ease of use, speed, functionality.

Organization of work on the project in such a way as to minimize the number of errors and improve the final quality of the product.

I worked on projects in such companies:

MasterELD - <https://mastereld.com>

ReliablePSD - <https://www.reliablepsd.com>

HOS 247 - <https://hos247.com>

HTML and CSS

Good knowledge. Used in practice when creating web pages.

JavaScript

Basic knowledge of this programming language. Used for web pages and to automate works in the projects.

Simple Calculator - https://tchv.github.io/Simple_Calculator

Git

Basic knowledge. In practice, used such commands as pull, push, commit, clone, and others.

SQL

Basic knowledge. In practice, I ran MySQL on a local server. Connected databases when creating sites on WordPress.

Gulp

Good knowledge. In practice, used in creating websites.

Angular, React, Vue JS

Familiar with the documentation. In practice, I used Angular when creating a web application.

To Do List - https://tchv.github.io/drivers_in_line

MODX

Basic knowledge. Used when creating websites.

Rython

Basic knowledge. I can write a simple program.

Adobe Photoshop

Good knowledge. In practice, used when creating templates for web pages.

WordPress

Good knowledge. Made sites on WordPress in practice.

Jira, Confluence, Teamwork

Good knowledge. In practice, I worked mostly in Teamwork.

Windows, Linux, Android

Good knowledge. In practice, I worked mostly in Linux.

Mac OS, iOS

Good knowledge. In practice, I worked with these operating systems on a virtual machine.

Projects

My Website

My personal website

My Website – https://tchv.github.io/Taras_Chorny

Drivers in line

This application is made using the Angular CLI. Used to build lists of drivers in a transport company.

Drivers in line – https://tchv.github.io/drivers_in_line

Other Projects

US Studio 24 – This is a support project for ELD. I'm the manager of this project.

US Studio 24 – <https://tchv.github.io/usstudio24>

Blahostynia – It is a website that I created for a charity organization. I'm a development and support of this website.

Blahostynia – <https://blahostynia.org>

Trainings

SkillUp - Quality Assurance

Learned to check the finished product for compliance. Found bugs and defects, checked the correctness of applications and sites.

EPAM Training - FRONT-END (JAVASCRIPT)

This training is dedicated to the approaches, technologies and instruments in development of visual elements that users see and interact with in a web application, or in other words, Front-end Development. It is designed for students who have programming skills and the basic understanding of web technologies.

VIEW HOMEWORKS - <https://github.com/tchv/fl-9>

Lviv IT School - Web UI (HTML, CSS, JS)

In these courses, I learned HTML, CSS, and the basics of JavaScript. Learned to create websites.
